

## Task 8: CRUD operations in document database

Aim:

To perform mongoose using NPM design on mongoDB's designing document database and performing CRUD operation like creating, inserting, finding, removing operations.

CRUD operation:

```
db.createCollection("cricket board")  
{'ok':1}
```

```
db.cricketBoard.insertOne({boardID: "B1D01",  
chennai_cricket_board_address: "chennai", phone: 998877663})
```

3

"asf\_knowledge": true

"inserted": object\_id ("5e11176fbff7993adff9d4")

3

```
db.Mylab.find({BoardID: "B1D01"})
```

```
{"_id": "5e11176fbff7993adff9d4",  
"name": "chennai", "cricket_board": "Address",  
"chennai": "phone", "998877663}
```

"acknowledged": true

object\_id ("65cc0e1bbff701939df9049")

3

```
db.cricketBoard.find()
```

```
{"_id": object_id ("087369664793cdfe04"),  
"BoardID": "name"}
```
